Reading for me

Foster a love of reading by supporting children to become independent readers

» Six-book series and online portal

» Suitable for Years 1 to 6

» A dyslexia-friendly font is used throughout

Reading for me is written in line with the National Literacy Learning Progressions, so teachers and parents can be assured that children's reading skills are developed as they progress through the series.

Each workbook uses a dyslexia-friendly font throughout for accessibility. Questions consolidate the reading experience: these questions are literal, inferential, evaluative and vocabulary-based, and allow teachers and parents to assess if children are actually reading the texts and comprehending the content.

There are four single-page texts per week for 30 weeks. This equates to 120 texts per year level, with Part A (printed paperback format) containing 60 texts and Part B (digital online format via the *Reading for me* portal) containing an additional 60 texts.

The text types vary and fit into three categories; persuasive, factual and imaginative. This means children get exposed to different styles of writing, enriching their reading experience.

REVIEW *This is a great resource for independent comprehension practice—the texts are accessible, varied and engaging and the questions test a range of comprehension skills.*

Mrs Cross, Teacher

Why choose Reading for me?

- A dyslexia-friendly font is used throughout the books.
- The reading difficulty of the texts increases gradually.
- Progression dots are shown on every text.
- Six questions follow each text to help monitor progress.
- Answers are provided for teachers and parents, or for children to self-correct.
- *Reading for me* is versatile and can be used for independent reading, guided in-class reading, group reading and as homework.
- The texts available via the *Reading for me* portal can be accessed anywhere with log-in details.

Sample pages from Level 4

Reading for me portal

PURCHASE READING FOR ME AND ACCESS 60 ADDITIONAL DIGITAL TEXTS ONLINE.

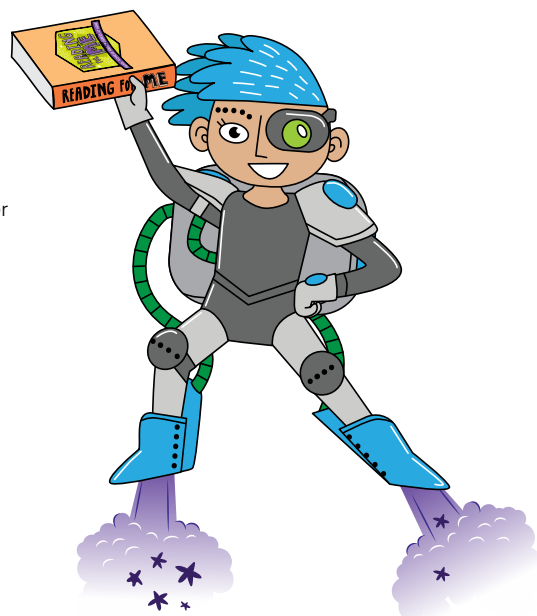

Read, achieve and progress at home with the *Reading for me* online portal

- » Provides flexible, fun and engaging ways to incorporate reading into every day
- » Implement reading in the classroom or at home
- » Online format allows you to access the series from anywhere

Why people love *Reading for me*

- The portal, combined with the physical books, the guides, and the questions, provides a comprehensive approach to support teachers and parents to foster a love of reading, while encouraging development and understanding.
- Once you log into the portal*, you can access teacher and parent guides, and certificates to celebrate the children's progress.

**Proof of purchase is required before access to Part B is granted.*

REVIEW 'Reading For me is such an incredible resource to help support student learning at home. Not only are students developing their reading skills, they are gaining a deeper understanding of texts through the six questions that accompany each text. A must have for those that want to provide extra support to their children's learning.'

@littlerainbowteacher

Someone's Staring!

Mouse, mouse, what do you see?
I see a bird staring at me.

Bird, bird, what do you see?
I see a cat staring at me.

Cat, cat, what do you see?
I see a dog staring at me.

Dog, dog, what do you see?
I see a sheep staring at me.

Sheep, sheep, what do you see?
I see a cow staring at me.

Cow, cow, what do you see?
I see a horse staring at me.

Horse, horse, what do you see?
I see a mouse staring at me.

Eek! Eek!

Questions

- Which animal was staring at the cat?
- Which animal was staring at the cow?
- Which animal was being stared at by the horse?
- Why did the horse say 'Eek! Eek!'?

- What things do you stare at? Why?

- Which word means the same as 'staring'?

At the Circus

I love the circus. The circus is the best. Everybody thinks so!

The circus has many people. They are clever.
Clowns are clever. Acrobats are clever.
Tumblers are clever. Trapeze artists are clever.

The circus has many people. They have skill.
The ringmaster has skill.
The strongman has skill.
The juggler has skill.
The magician has skill.

The circus has many people. They are amazing.
The tight-walker is amazing.
The fire-eater is amazing.
The knife-thrower is amazing.

The circus is the best.
You should go to the circus.
You will love it. You will love the people. They are clever.
They have skill.
They are amazing.

New wave English skills practice

Daily challenges to build your students' language skills

- » Six-book series
- » Suitable for Years 1 to 6
- » Reinforce English skills with 160 days of questions

The *New wave English skills practice* workbooks provide repeated, daily practice of English language concepts, which in turn will help students acquire and strengthen the skills they need to be competent and confident in their use of English. There are questions to answer in the areas of phonological awareness, reading comprehension, spelling, word study, punctuation and grammar. This 2022-revised edition is an essential resource for any teacher.

REVIEW *'The books challenge children and provide repetition to support children in their learning. They are a steal for the amount of work provided in them. They have improved children's spelling, punctuation and grammar through daily repetition in our class. A must for every booklist!'*

Elaine Joy, Teacher

Features

- These revised workbooks are designed with a more student-friendly format, including larger print and question spacing.
- Each workbook presents 160 days of mixed skill practice, arranged into four eight-week units.
- Each workbook includes 28 skill focus mini-lessons and a dedicated daily skill focus section, addressing challenging concepts.

The Comprehension strategies box

Unlock students' reading abilities

» Downloadable full-colour posters available

» Easy to use with small groups or individuals

» 162 cards per box, colour-coded by strategy

The *Comprehension strategies box* is a set of six boxes suitable for children aged 5-11+. Each box contains a set of full-colour, differentiated literacy cards, designed to support the teaching and learning of nine different comprehension strategies. These well-researched and proven strategies—predicting, visualising, making connections, questioning, clarifying, summarising, determining importance, inferring and synthesising—are compiled to help teachers unlock their students' reading abilities.

Features

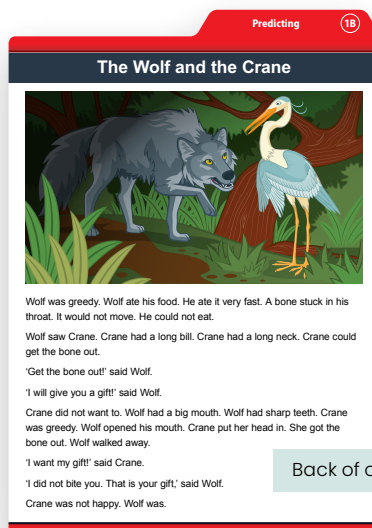

- Each box contains 81 original texts across both the cards and teacher guide, allowing students to experience a variety of fiction and nonfiction text types.
- This series caters for all while learning the same strategies, with three differentiated reading levels by suggested Lexile® ranges for each strategy, and a placement test provided to ascertain students' starting points.
- Teachers are provided with extensive support through a comprehensive teacher guide and an additional activity book with worksheets for all texts on the cards.

EACH BOX INCLUDES AN ACTIVITY BOOK AND A TEACHER GUIDE.

Modelling text

Summarising **Modelling text**

Dear Mr Colour Wheel

SPEAKER: Welcome, dear Mr Colour Wheel. We're pleased to speak to you today. People want to know all about you.

MR COLOUR WHEEL: Thank you. I'm very glad to answer your questions. I don't know what people want to know. It's a very simple fellow.

SPEAKER: Please tell us what you do.

MR COLOUR WHEEL: In the circle that shows the important colours people need. The colours are yellow, blue and red. We use them to make all other colours.

SPEAKER: What do you mean?

MR COLOUR WHEEL: Mix yellow and blue and you get green. Mix blue and red and you get purple. Mix red and yellow and you get orange.

SPEAKER: Very clever! People can't use colours without you.

MR COLOUR WHEEL: Of course not! But don't see about black or white! They're real inspirations! No colour at all!

Sharing text

Summarising **Sharing text**

The Blue Flamingo

The Blue Flamingo is a good book. Lee Drake wrote it. Tim Clares drew the pictures.

The book is about Blurry. Blurry is a flamingo. Most flamingos are pink. They are pink because they eat pink shrimp. Blurry is not pink. Blurry is blue. He is very sad. He does not want to be blue. Blurry tries to find out why he is not like the other flamingos. He does some funny things. He meets some funny characters. Then he finds out it is okay to be different. It is okay to be who you are.

The writer makes funny things happen. He writes about funny animals. He teaches about some good things.

The pictures are funny and colourful. They are like a cartoon.

I liked The Blue Flamingo. I think you will like it too.

Assessment text

Summarising **Assessment text**

Not a Great Colour!

Yesterday, we went to the beach. Mum carried the towels. Dad carried the food. Jay carried the beach umbrella. Seb carried the ball. I carried the buckets and spades.

We found a good spot. It was close to the water. There weren't too many other people to crowd us.

We swam and built sandcastles. We played games with the ball and ate the food. We stayed all day.

When we got home, we were really tired. We washed our buckets, spades and ball. Then we put them in the garden to dry.

Soon it was my turn to shower. When I was dry, I spied my face and shoulders in the mirror. What a shock! Red is not a great colour! It was starting to hurt.

That's when I realised that no-one had carried the sunscreen.

Sample card from Box 1

Summarising **2A**

The Ballad of Brown Cow

Brown Cow was a fussy sort. He loved his hide. He truly did. 'I must keep it brown!' he thought. He had some ideas jumbled in his head.

Brown Cow was a fussy sort. He loved his hide. He truly did.

He drank chocolate milk when he went to town. He painted his hide brown. He let it dry. He ate hay all day. It was always brown. He rolled in mud when rain fell from the sky.

Brown Cow was a fussy sort. He loved his hide. He truly did.

The others thought him very strange. They didn't do things that were odd or weird. You are what you are. You cannot change. 'We're glad to be what we are!' they cheered.

BUT ...

Brown Cow was a fussy sort. He loved his hide. He truly did.

Summarising **3A**

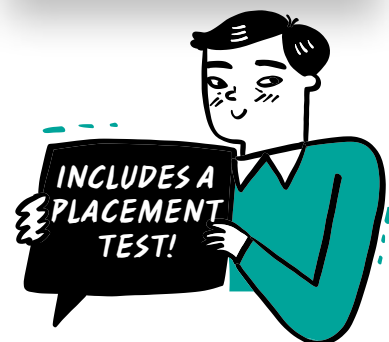

Colour-changing Chameleons

Chameleons are lizards. Chameleons have clever skin that can change colour. Their skin can make patterns of many colours. They can change the colour of their skin to hide from enemies. They show dark colours when they are angry or trying to scare other animals. Male chameleons show colours to attract females. Desert chameleons change to black to help them stay warm. They also change to light colours to keep cool.

They have large, bulging eyes that can rotate. This allows them to focus on one thing. They can see insects metres away. They use their long tongues that they can use very quickly to catch insects.

Colour-changing chameleons are very interesting!

The Comprehension box

Help your students become better readers

- » Three-box series
- » Suitable for Years 1 to 6
- » Great for both independent and guided learning

The *Comprehension box* is a series of three boxes that provide supplementary materials to support the reading program of teachers, catering for the needs of capable, independent readers at each level in the classroom. Each *Comprehension box* incorporates three levels of comprehension question cards in a multiple-choice format and assesses the 12 different comprehension strategies. They are easy to use for any level, so jump right in and make a difference with your students today.

ricpublications.com.au/compboxsample/

EACH BOX INCLUDES A TEACHER GUIDE.

Features

- There are 150 brilliantly illustrated, coloured cards in each box, covering a variety of genres and text types.
- Levelling guides and assessment sheets are provided to track students' progress.
- Classification is made clear through colour-coding, with 15 levels of difficulty within each box that are colour-coded for ease of use.

Samples from Box 2

Card explanation

Start

The colour-coded top of the card indicates the different sections. These are: the main content in each section. This ensures that all cards can be returned to the box in the correct section.

The words are numbered 1 to 10 in each section. All cards should be returned to the correct coloured section and placed in the correct numbered order.

Each card has an interesting or fun title which may or may not tell exactly what the card is about. It motivates the pupils to read on to find out more.

Each card is written in numbered paragraphs and steps of information with the words located when answering the questions. Texts which use procedures will show numbered steps of instructions.

Cultural advice supports the text. The artwork may be diagrams, drawings, cartoons or photographs to further pupils' understanding of the text in a comprehension.

Section 1

What is the sky?

1 Long ago, there was an area of the world where the sky was not blue but it was a vibrant colour and stretched up as high as you could reach it.

2 In that area of the world, there was a village where a little girl wanted to fly to find out why it was that way. She wanted to know how it was created, what it was made of and how it was created.

3 One day, her father told her that the sky was not blue but it was a vibrant colour and stretched up as high as you could reach it. She wanted to know how it was created, what it was made of and how it was created.

4 The little girl wanted to know how it was created. She wanted to know how it was created. She wanted to know how it was created. She wanted to know how it was created.

5 Finally, the little girl was able to fly. She was able to fly. She was able to fly. She was able to fly. She was able to fly.

6 The sky was not blue but it was a vibrant colour and stretched up as high as you could reach it. She wanted to know how it was created, what it was made of and how it was created.

7 To be able to fly, she had to be able to fly. She was able to fly. She was able to fly. She was able to fly. She was able to fly.

Teacher guide

Handwriting today

Your whole-school handwriting program!

» Student workbooks for Foundation to Year 3

» Teacher resource books for Years 4 to 6

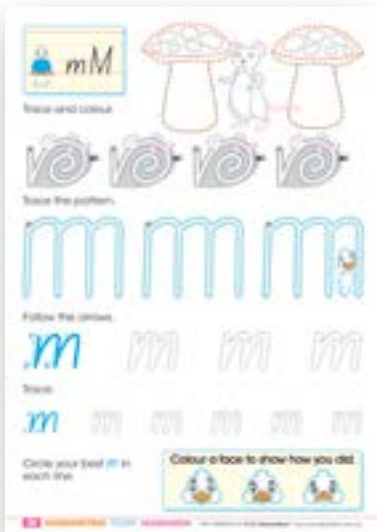

» Available in New South Wales Foundation style and Victorian Modern Cursive

Give your students the practice they need to write legibly, fluently and quickly in order to succeed. By achieving mastery of handwriting through repeated practice, students can concentrate on developing their ideas rather than on their effort to write. *Handwriting today* is a whole-school program that will give you the support to plan and execute a successful handwriting strategy. Have a closer look and find out how this series can help your students today!

Features

- This series provides robust scaffolding for the development of students' handwriting skills.
- Intuitive prompts help to guide students through the correct letter formations.
- Specialised materials are included, with differentiated tasks for left-handed writers, vision-impaired children, or students with poor fine motor skills.

Use the metacognitive approach to teach comprehension

- » Seven-book series
- » Suitable for Foundation to Year 6
- » Includes background notes and information for each strategy

Teaching comprehension strategies is designed to methodically and creatively teach students the skills and strategies needed for effective comprehension. These strategies have been defined as understanding words, finding information, identifying the main idea, sequencing, comparing, predicting, concluding, summarising, inferring, cause and effect, fact or opinion, and point of view.

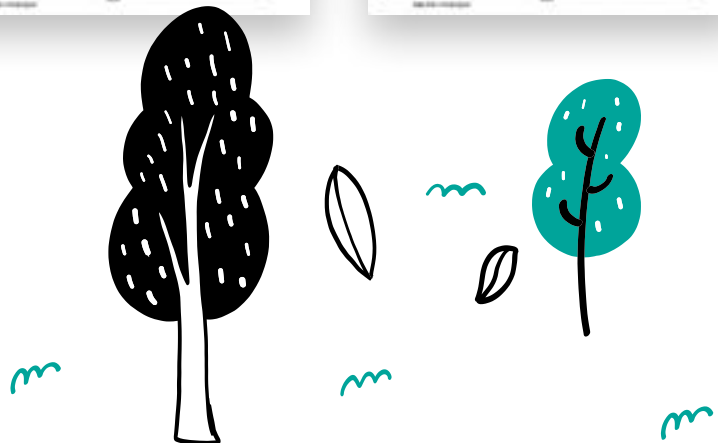

Features

- A variety of original texts, customised to suit the strategy being highlighted, are included.
- The skills and strategies are taught using explicitly modelled examples and activities.
- The assessment activities feature questions where students can apply the comprehension strategies that have been taught.

Comprehension through cloze

For a free sample, go to:
ricpublications.com.au/compthroughclozesample

Develop comprehension skills through imagination and illustration

- » Six-workbook series
- » Suitable for Years 1–6
- » Covers the nine comprehension strategies

Can't get enough of *Teaching comprehension strategies*? Then you'll love *Comprehension through cloze*! This series aims to develop students' comprehension using high-interest, engaging and challenging activities. Each unit develops comprehension through three approaches: a reading passage with incomplete illustration, a cloze passage based on the illustration, and two focus pages on a specific comprehension strategy.

Features

- The activities encourage greater sensitivity to detail as students must identify missing details in illustration and text.
- Students are kept engaged and enthralled with original stories from a variety of genres and high-interest activities.
- This series extends vocabulary by encouraging students to choose new and different words to complete a story.

Teaching strategies for writing

For a free sample, go to:
ricpublications.com.au/teachingstratsample/

Improve writing at sentence level!

- » Six-book series
- » Suitable for Years 1 to 6
- » Covers word choices, sentence structure, punctuation and editing/proofreading

A simple change in text can create a difference in meaning. When teaching students to write well, we need to emphasise the importance of correct grammar, punctuation, spelling and structure. This six-book series will direct students to produce clear, precise, purposeful writing. By applying these strategies, students will understand that editing and proofreading are integral parts of the writing process.

Features

- Each book is divided into four sections, covering the basics of good writing.
- Worksheets can be completed independently or in groups/with the teacher, allowing for levels of differentiation.
- Each unit has a page of assessment activities, giving teachers a record of individual understanding and achievement, and highlighting common points of weakness.

THERE ARE MANY STRATEGIES THAT CAN BE TAUGHT TO HELP CHILDREN UNDERSTAND WHAT THEY READ.

MANY CHILDREN THINK VISUALLY. USE THESE ACTIVITIES TO HELP CHILDREN VISUALISE WHAT THEY READ AND IMPROVE THEIR COMPREHENSION:

- IF THE TEXT INCLUDES A CHARACTER OR SETTING DESCRIPTION, ASK CHILDREN TO FORM A PICTURE OF IT IN THEIR MINDS. ASK THEM TO DRAW IT. CAN THEY ADD ANY DETAILS TO THE AUTHOR'S DESCRIPTION?
- DOES THE TEXT INVOLVE A JOURNEY? CHILDREN CAN DRAW A MAP TO VISUALISE WHERE THE CHARACTERS WENT AND THE PLACES THEY VISITED.

THE COMPREHENSION STRATEGIES BOX IS A NEW SERIES TO HELP CHILDREN LEARN AND PRACTISE A RANGE OF COMPREHENSION STRATEGIES – SEE PAGES 12–13.

Introduce initial blends and digraphs

Active phonics is a series of three teacher resource books that require students to use visual and auditory discrimination skills with pictures and words to identify each phonic sound being treated.

Features

- Inject some fun into your lessons with phonic-based colouring, and circling/matching activities that focus on a single consonant sound, blend or digraph.
- Challenge your students to copy each single consonant sound, blend or digraph with school script.
- Extend your lessons further by adding your own words to the given list of final sounds.

Phonics in context

	AGES	CODE	PRICE
Book A	5–7	0647	\$39.95
Book B	5–7	0648	\$39.95

A fun approach to consolidating common sounds

Phonics in context provides opportunities to expand students' sight and phonic vocabularies in the context of a story. The books contain a selection of stories, with each one concentrating on a particular sound group. The content of each story and accompanying artwork add a humorous element, appealing to both students and teachers.

Features

- Get students' attention with a selection of stories, each concentrating on a particular phonic sound group.
- Help your students consolidate and expand their phonic and sight vocabularies.
- Comprehensive activities accompanying each story include word recognition, spelling, comprehension and word study.

Reading with phonics

	AGES	CODE	PRICE
Book 1	5–7	6308	\$43.95
Book 2	5–7	6309	\$43.95
Book 3	5–7	6310	\$43.95

Teach phonics in context

Present a focus sound(s) in the context of a narrative, rather than in isolation, and help students practise identifying and using the sound(s) while reading and comprehending.

Features

- Includes worksheets to reinforce students' phonemic awareness and consolidate the learning of phonic sounds.
- Provides differentiation opportunities with texts and worksheets of varying degrees of difficulty.
- Presented in an easy-to-follow format both students and teachers will enjoy.

Speaking and listening

Listening comprehension

	AGES	CODE	PRICE
Lower	5-7	2023	\$28.95
Middle	8-10	2024	\$28.95
Upper	11+	2025	\$28.95

Activities to improve listening skills

Help your students maximise their learning potential by developing their listening skills and memory retention.

Features

- Students follow interesting and challenging instructions read out by the teacher.
- Exercises can be tackled as a whole class, in small groups or in pairs.
- Exercises become progressively more difficult and results are recognised in other subject areas.

Year 6 – Secondary	11+	6323	\$43.95

Make English fun with this excellent resource

'I have, who has?' – English is a series of three teacher resource books designed to reinforce basic literacy skills using auditory discrimination as the major focus.

Features

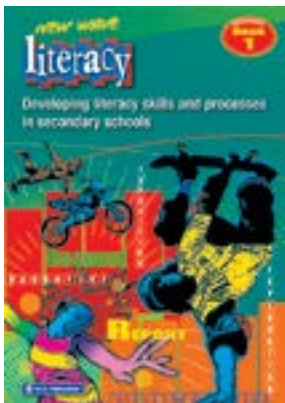

- Use game cards to complete a chain of engaging questions and answers, designed to apply learning.
- Each student stays involved by using the supporting active listening worksheet, designed to track the progress of the game.
- Each book contains simple-to-prepare activities, blank proformas and clear and concise answer pages.

Secondary

New wave literacy

Develop literacy skills and processes in secondary students

This series is full of fun activities written especially to help students practise their literacy skills. Packed full of interesting information, it'll help engage students in their literacy achievement progress. The program is focused on upper-level thinking skills that underpin literacy competence.

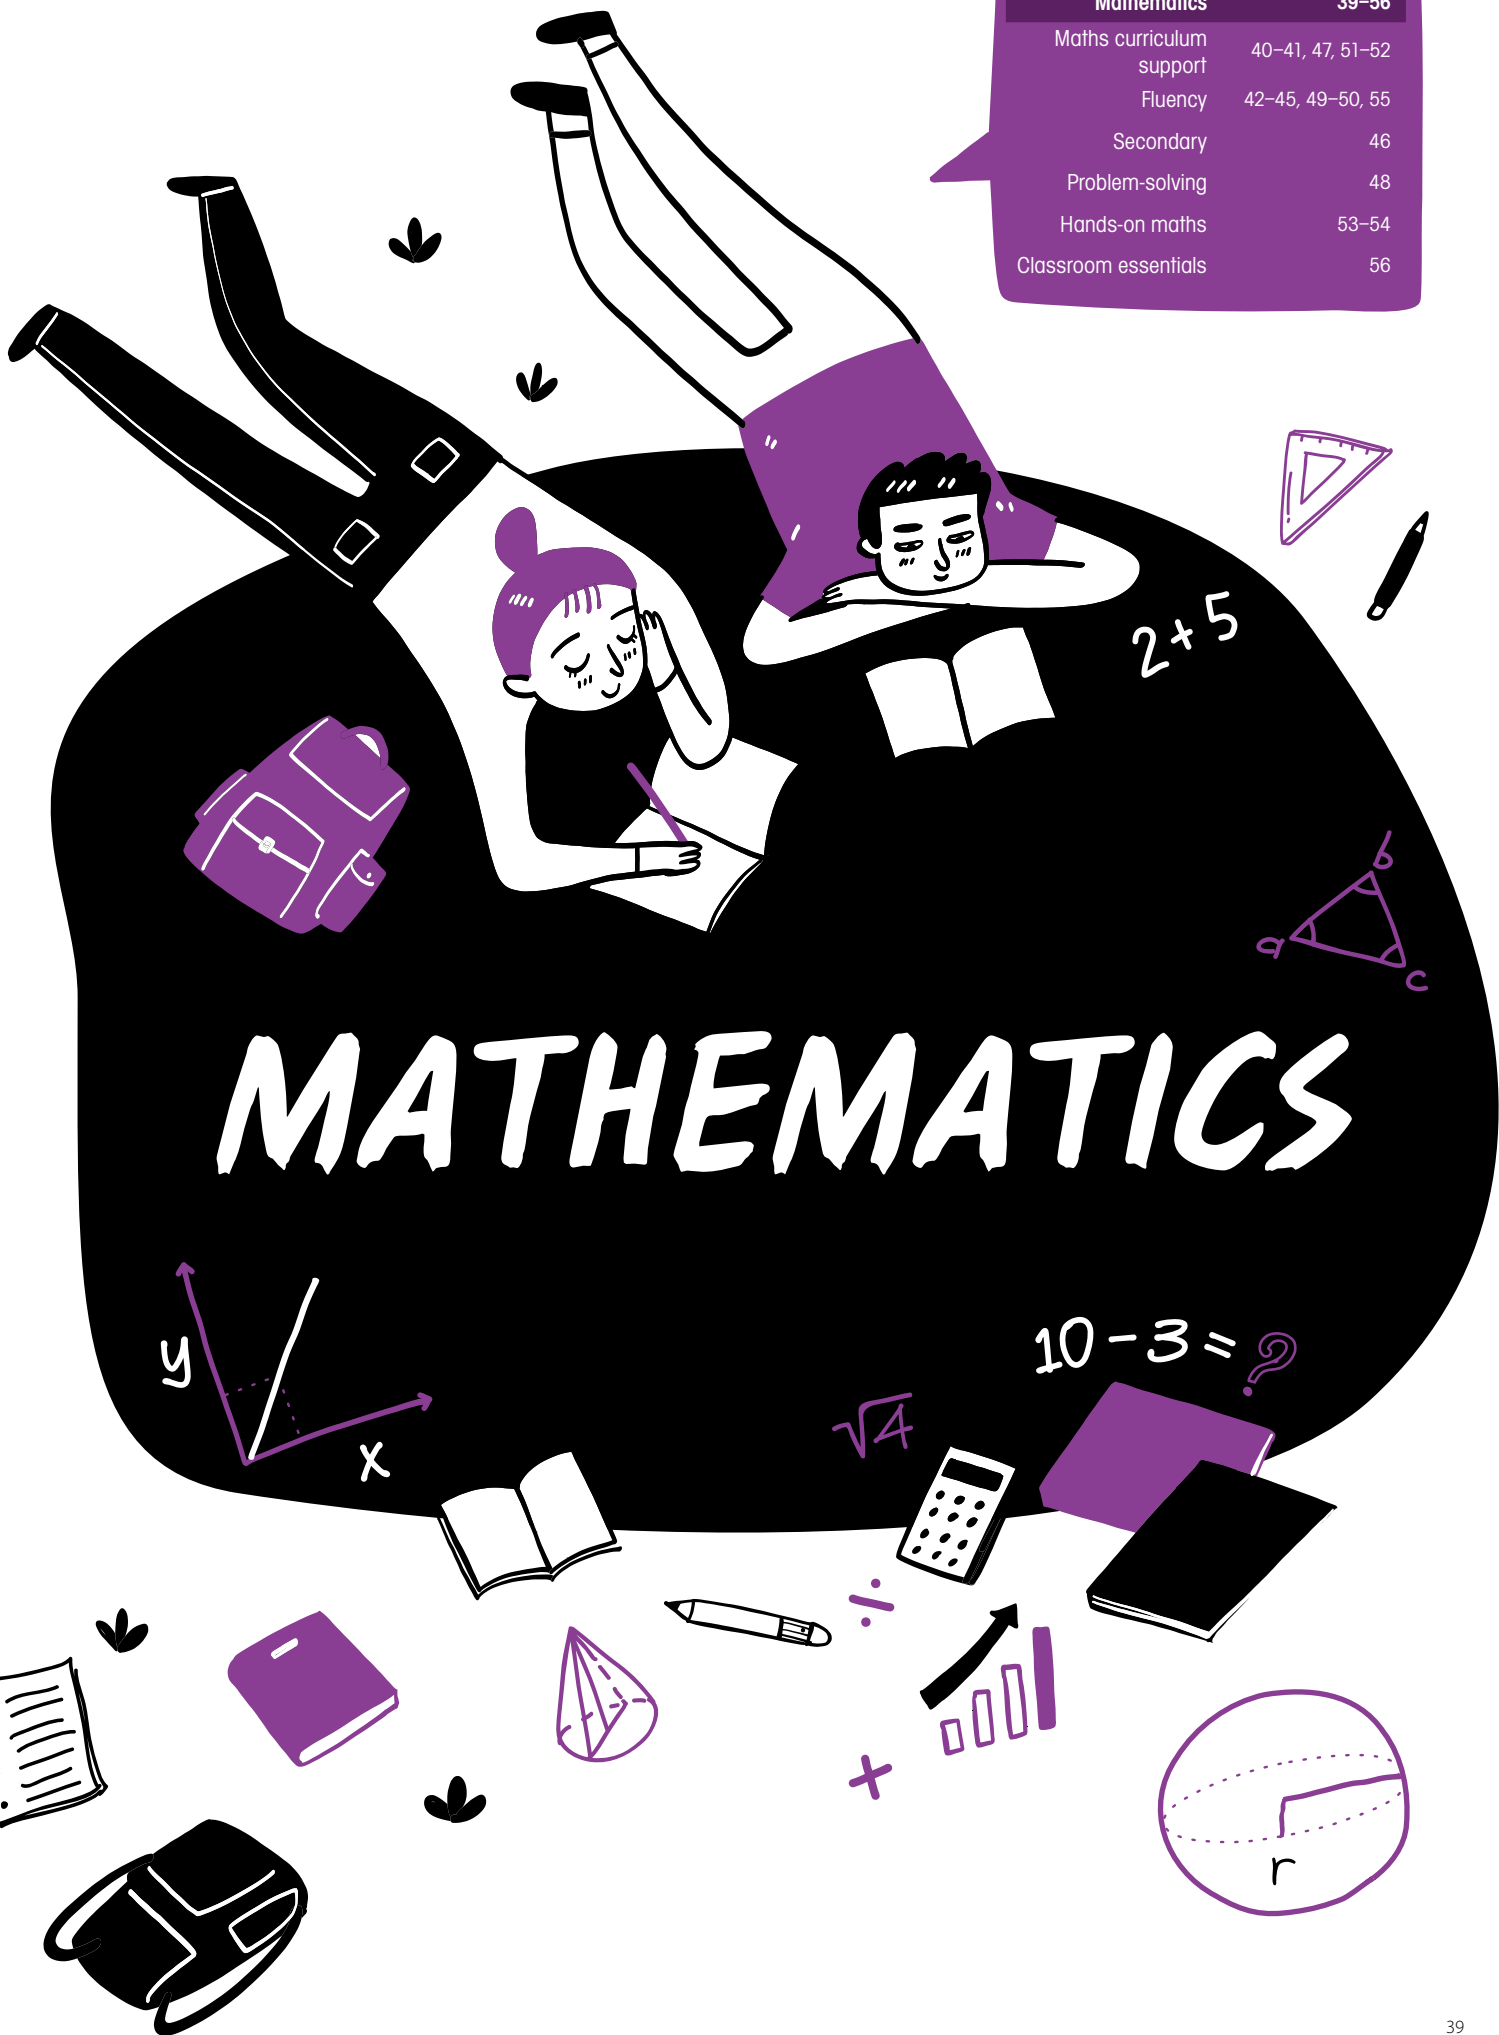

Features

- Each book is based on a modern text approach to reading and writing, with content themes that are relevant to students of each year level.
- The process themes provide a developmental, sequential coverage of major literacy skills.
- The series is organised into easily managed modules built around a theme, which are great for group work or independent students.

REVIEW 'The Maths box encourages resilience, independence and confidence in maths learning. We have used the resource in a variety of ways, as part of a targeted intervention, independent extension, consolidating activity or short assessment.'

Jane Hainsworth, Teacher

Sample pages from Box 3 teacher guide

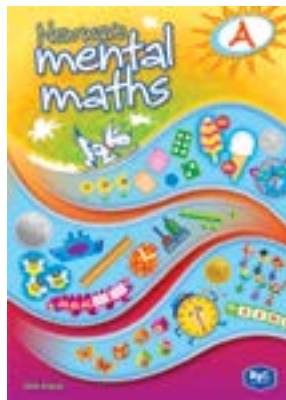

Motivate your students with fun, creative and challenging activities! *The Maths box* provides practice and consolidation of skills already taught in the classroom, with opportunities to extend students further. Designed to be flexible, this resource allows for independent, small-group and whole-class maths activities. This gives teachers freedom to roam the classroom and provide more tailored teaching for individual students.

Features

- Use anytime to reinforce maths concepts and support your maths program. The box supports the Australian Curriculum Mathematics learning area, and includes scope and sequence charts to map your coverage.
- *The Maths box* allows for independent learning—it can be tailored for individual students' learning goals, strengths and weaknesses.
- It is designed to provide intellectual engagement and connect learners to the wider world.

Fluency

New wave mental maths

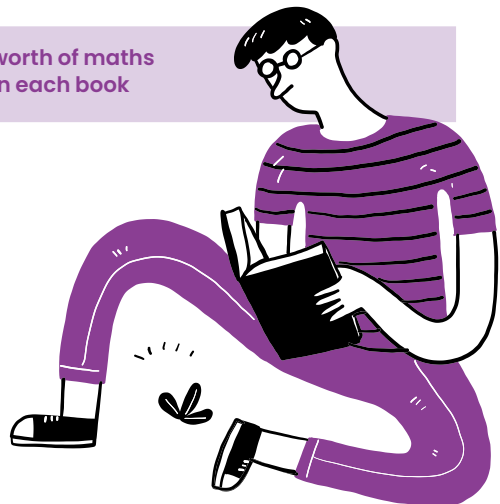

Give students the best opportunity to succeed in maths

» Seven-workbook series

» Suitable for Years 1 to 7

» 200 days' worth of maths problems in each book

With over 20 years of research and continuous development, our bestselling series is still the best mathematics practice resource for the modern classroom. Visually rich and engaging, *New wave mental maths* provides daily practice to increase students' fluency and automaticity in all three maths strands.

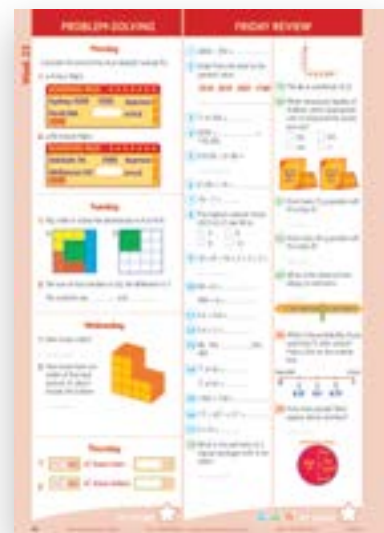

HAVE A CLOSER LOOK AT THIS WORKBOOK SERIES AND FIND OUT HOW IT CAN MAKE A DIFFERENCE IN YOUR SCHOOL TODAY.

REVIEW 'New wave mental maths is great! I have used a variety of levels to suit different grade levels and abilities. The days-of-the-week sections make it a simple way to do a warm-up in a maths lesson.'

At the end of the week, Friday Reviews are so handy to keep track of their progress and to inform what we need to cover more of or extend on.'

Jill S, Teacher

Features

- The books are centred around daily practice of mathematics, with a spiral learning method to consolidate and improve students' skill levels—with 200 days' worth of maths problems in each book.
- Problem-solving questions given each week, designed to develop students' ability to make choices, interpret, formulate, and communicate solutions effectively.

SAVE MORE TIME WITH THE ONLINE PORTAL FOR TEACHERS!

'These books are awesome!

I have purchased the correct level for each class member to give them all daily revision of a range of maths concepts. The students love the colourful presentation and the format of the books and daily activities.'

DI MCCOSKER

*'Love this book!
So handy for NAPLAN practice.
The questions are ideal for warm ups
and consolidating before we begin a topic.'*

KATE FARNIG

HOW DOES NEW WAVE MENTAL MATHS HELP STUDENTS AND TEACHERS?

*'New wave mental maths is great!
I have used a variety of levels to suit different grade levels and abilities. The days-of-the-week sections make it a simple way to do a warm up in a maths lesson. At the end of week, Friday reviews are so handy to keep track of their progress and to inform what we need to cover more of or extend on.'*

JILL S

*'My kids loved this book.
The pictures are amazing, very bright and colourful. I would definitely recommend!'*

Tina Prochella

'A teacher friend recommended this resource; I am blown away by how far my Year 4s have come in such a short space of time. I would 100% use this product again!'

Maddie McC

HOW DO STUDENTS KEEP THE MOMENTUM OF THEIR LEARNING?

A WORD FROM **EDDY**

*'When I started teaching in the early 1990s, I found that a large number of students lacked understanding and skills of simple maths, like telling the time, basic facts, money and simple strategies. Traditionally, these skills are taught and worked on once and then forgotten. I find that this is causing a tremendous strain on both teachers and students and is the main reason I've developed *New wave mental maths*. The workbooks provide a way to reinforce taught concepts through repeated practice and lift students' overall maths results.'*

EDDY KRAJCAR

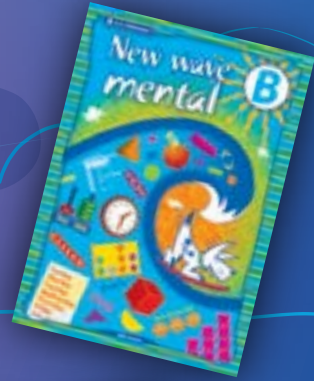

REINFORCE AND CONSOLIDATE EVERY DAY

'Love the inclusion of the problem-solving section!'

CHLOE SCOTT

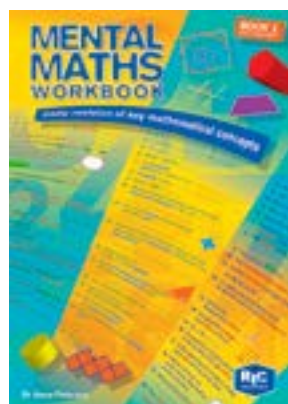

New wave mental maths

NEW WAVE MENTAL MATHS
THROUGH THE YEARS...

Secondary

Mental maths workbook

Daily revision of key mathematical concepts for secondary students

- » Three-workbook series
- » Suitable for ages 12–16+

» Supported by a comprehensive teacher guide

With activities covering all areas of mathematics, the *Mental maths workbook* series is the perfect comprehensive daily practice resource suitable for lower secondary students. Each workbook provides a structured daily program of practice and consolidation for an entire year.

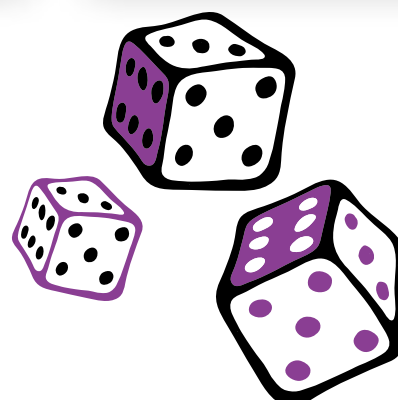

Features

- This series provides students with the opportunity to practise and consolidate taught mathematical concepts.
- With 40 weeks of mental maths material in each book, you will be equipped with more than enough content to cover your whole year.
- *Mental maths workbook* is fully supported by a comprehensive teacher guide—free when you purchase a class set.

Primary mathematics

Fulfil all your mathematical needs

Students will love learning with this series! All your mathematical needs are covered with over 150 activity pages, as well as introductory activity suggestions for each resource. Packed with fun and informative questions and games, as well as quirky character illustrations, *Primary mathematics* is a winner.

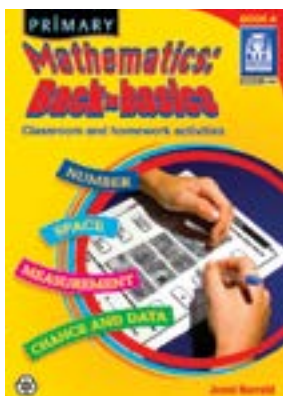

Features

- Comprehensive teacher notes are provided for each individual strand, listing required materials, activities and games.
- Each book covers the traditional mathematics areas of number (including patterns and algebra for New South Wales), measurement, space, and chance and data.
- Revision and assessment pages for each strand are in each book, which are ideal for inclusion in student portfolios and for reporting purposes.

Embed mathematical problem-solving and reasoning in your lessons with the *Problem-solving strategies and skills* maths cards!

These beautifully illustrated cards provide a wide variety of motivating and high-interest problem-solving activities. The problems involve one or several steps, requiring the use of a variety of strategies and skills to solve.

Features

- Each box covers a mathematical strand—Number and Algebra, Measurement and Geometry, and Statistics and Chance—with 30 unique cards in each box.
- Strategy icons marked on each card encourage students to select the most effective strategy to solve the problem.
- Each box has a variety of differentiated problems including word, logic and visual real-life scenarios.

Problem-solving in mathematics

Develop problem-solving and mathematical thinking

This series features a variety of fun and challenging activities that will boost your students' problem-solving capabilities and mathematical thinking. This series is specifically designed to be used as extension work to challenge higher-ability students, with activities requiring students to use strategies and different approaches to solve the problems.

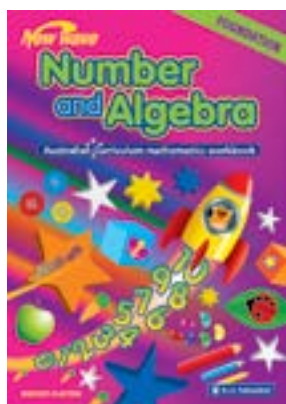

Features

- Features activities involving spatial visualisation, logical reasoning, establishing criteria, interpreting, analysing, and much more.
- Includes extensive background information about problem-solving skills and teacher pages to accompany each student activity page.
- Structured to focus on a problem-solving objective for each group of student pages.

Book 2	8-14	0079	\$35.95

Improve calculation skills

Maths speed tests provides students with opportunities to improve their rapid calculation skills with essential addition and subtraction facts.

Features

- Each book contains a self-completion aspect, encouraging students to enjoy the activities while reinforcing the knowledge of essential facts.
- There is additional material on most pages for fast finishers.
- Ten sheets can be used to make a student's booklet for a term, and a blank speed test has been included for the teacher to create their own, depending on students' needs.

Classroom essentials

Essential facts and tables

	AGES	CODE	PRICE
Year 3 to Secondary	8+	1091	\$6.95

Essential maths support for teachers and students

This is an invaluable resource book for students and teachers that includes symbols, tables, formulas, definitions and spelling rules.

Features

- It includes both English and maths in a compact, ready-reference format.
- Easily-accessible information is available through a clear layout and careful indexing.
- Contains all the help you need, with symbols, multiplication tables, formulas and more.

Times tables and basic facts

	AGES	CODE	PRICE
Years 2-6	7-12	5103	\$7.95

Provide regular mathematical practice for your classroom

Tune your students' minds into mathematical ways of thinking by creating a useful routine! This resource provides students with a quick maths basic facts test every day.

Features

- The tests cover the basic facts of adding, subtracting, multiplying and dividing.
- Its clear and easy-to-follow format allows students to jump right in.
- An answer key is available on request.

'IN MY TEACHING EXPERIENCE, I'VE FOUND THAT MATHS SKILLS ARE OFTEN TAUGHT AND WORKED ON ONCE THEN FORGOTTEN, CAUSING A TREMENDOUS STRAIN ON BOTH TEACHERS AND STUDENTS. THIS IS WHY I'VE DEVELOPED NEW WAVE MENTAL MATHS – IT PROVIDES A WAY TO REINFORCE TAUGHT CONCEPTS THROUGH REPEATED PRACTICE AND LIFTS THE STUDENTS' OVERALL MATHS RESULTS.'

TEACHING MATHEMATICS SKILLS

Maths terms and tables

	AGES	CODE	PRICE
Years 3-6	8+	1069	\$20.95

Simple descriptions of terms: clear tables, charts and diagrams

Written by leading mathematical educators, Dr Paul Swan, Linda Marshall and Jack Bana, this essential reference book is crucial to help parents, teachers and students understand maths terms better.

Features

- A comprehensive listing of common mathematical terms, tables and concepts with brief yet accurate definitions is provided.
- Definitions are written in unambiguous, easily-understood language, preventing confusion.
- This is a key reference and highly-accessible resource for users at all levels—students, teachers and parents.

Help your students become innovative, communicative, collaborative and thoughtful problem solvers

» Seven-box series

» Suitable for Foundation to Year 6

» 28 unique projects in each box

The *STEM projects* series provides opportunities for students to develop skills and knowledge in science, design and technology, and mathematics, as well as general capabilities, while completing short- or long-term projects. It encourages students to follow a consistent design process while completing the projects, including finding out information, planning and designing, creating, evaluating and communicating.

Features

- The projects allow students to work in small teams, using effective communication and collaboration skills to plan, design, create and evaluate a thoughtful and innovative solution to a given task.
- When satisfied with their solutions, students are able to showcase and discuss their design, explaining how science was used throughout the project.
- The cards are designed to provide little interference to the students' creativity, allowing them to create their own paths.

Prepare your students for the roles of the future

- » Seven-book series
- » Suitable for Foundation to Year 6
- » Fully linked to the Australian Curriculum

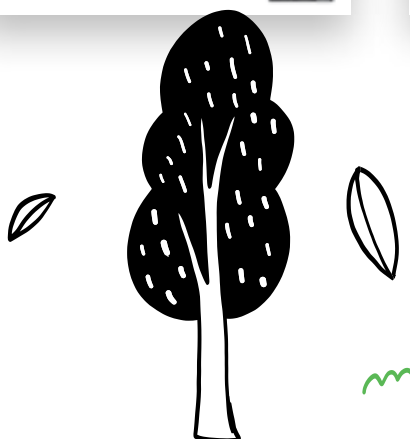

Minds will be challenged and imaginations unleashed as students develop skills such as innovation, creativity, reasoning and problem-solving; and technical science skills such as questioning, observing, systematic experimentation, and analysis and interpretation of data. Feel confident delivering a comprehensive and contemporary science program, and ease your way into STEM projects with *Science: a STEM approach*.

Features

- Each book is split into four units, which are organised by sub-strand—Biological sciences, Chemical sciences, Earth and space sciences and Physical sciences.
- Each unit is designed to be easy to follow for the teacher, with a term overview at the start of each unit and comprehensive background information.
- A variety of fun and interesting projects each link the science knowledge and skills learnt with aspects of engineering, design and technology, information technology and mathematics.

Develop process and production skills through hands-on activities

» Six-box series

» Suitable for ages 6–12

» Hands-on projects to engage students

Design and technologies: project-based learning is a six-box series that offers opportunities to hone students' process and production skills while designing and creating interesting and fun projects. The flexibility of the four themes (Food and cooking, Clothing and textiles, Building and construction, and Technological advancements) means that projects can be adapted where necessary. No matter which project your students are working on, they will be collaborating and communicating to find solutions to real-world problems.

Features

- The boxes contain a variety of real-life projects across the units of Food and cooking, Clothing and textiles, Building and construction, and Technological advancements.
- Fun projects include designing and creating jelly cups, fabric bunting, a 3D town map and a snowmobile model.
- Teacher notes are included, along with a list of all projects covered in the box.

Features

- Australian Curriculum History covers all relevant curriculum content descriptions in the Historical knowledge and understanding strand for each year level.
- The series provides students with the framework for investigating Australia's history through key inquiry questions.
- It enhances any school's history program, providing a springboard for further investigation into people and events of the past.

Sample pages from Year 5

Australian Curriculum Geography

Enrich your students with the knowledge of geography

- » Seven-book series
- » Suitable for Foundation to Year 6
- » Linked to the Australian Curriculum

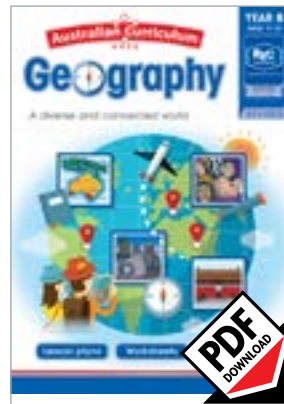

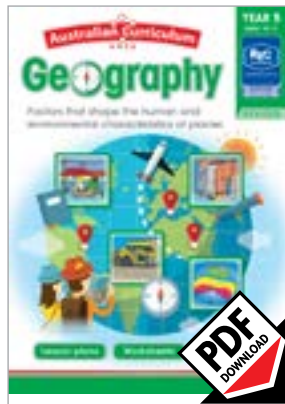

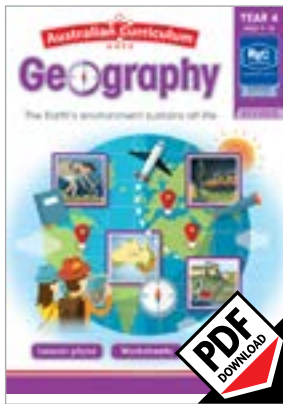

Revised in 2021, *Australian Curriculum Geography* is a series of seven books, designed to complement the teaching of geography in the national curriculum. Each topic is introduced by a text to support the Geographical knowledge and understanding strand. This is followed by activities to investigate the key inquiry questions, using the geographical and inquiry skills expected of the year group. Together, these provide the framework for investigating the geography of Australia, its neighbours and the rest of the world.

Dive into these fascinating ancient civilisations

This series provides a comprehensive resource for teachers and students studying these fascinating ancient civilisations.

Features

- Teachers notes, historic information and quality worksheets are included in each book.
- A variety of cross-curricular activities is provided.
- An in-depth look at the world's most fascinating civilisations makes learning fun for students.

Honouring our heritage

Written to commemorate the centenary of WWI and the Anzacs in Gallipoli. *Anzac Day* covers nine different topics and engages students with exciting activities.

Features

- *Anzac Day* has comprehensive information about why and how Anzac Day is observed and what it involves.
- It details the Gallipoli campaign, fighting on the Western Front during World War I and more.
- The latest information about Australia's defence forces, including uniforms and armaments, is included.

AC Mapping skills

	AGES	CODE	PRICE
ebook 1	5–8	3736	\$29.95
ebook 2	8–10	3737	\$29.95
ebook 3	10–11+	3738	\$29.95

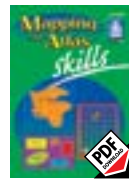

Improve your students' mapping skills

Give students the best resource for developing their skills in creating, reading and understanding maps through learning mapping techniques and concepts.

Features

- Each book has a large selection of procedural-based activities to develop students' understanding of mapping skills.
- Assessments are spread throughout the book to measure students' progress.
- Structured content allows teachers to isolate errors for improvement, and teach specific parts of text.

Mapping and atlas skills

	AGES	CODE	PRICE
Lower ebook	5–7	3976	\$22.95
Middle ebook	8–10	3977	\$22.95
Upper ebook	11+	3978	\$22.95

Gives students life-based mapping skills

Mapping and atlas skills gives students a wide range of real-life applicable skills to provide value to students outside the classroom.

Features

- This series focuses on specific mapping skills that are required in maths and society and environment classes.
- Blackline master activities give students the opportunity for accurate identification of known and unknown locations.
- *Mapping and atlas skills* improves skills of coordinates and compass-based work, as well as providing general directional information.

Civics and citizenship, and Economics and business

AC Civics and citizenship

	AGES	CODE	PRICE
Year 3 ebook	8–9	3739	\$25.95
Year 4 ebook	9–10	3740	\$25.95
Year 5 ebook	10–11	3741	\$25.95
Year 6 ebook	11–12	3742	\$25.95

Stimulate learning about leadership

Australian Curriculum Civics and citizenship teaches students about how to be interested and active citizens. There is a fundamental agenda of inquiry with questions and related activities throughout. The series motivates and creates enthusiasm about being future leaders and decision-makers.

Features

- Each book has three sections: Government and democracy; Laws and citizens; and Citizenship, diversity and identity.
- Each book has Australian Curriculum-based links for Civics and citizenship as well as HASS inquiry and skills links.

AC Economics and business

	AGES	CODE	PRICE
Year 5 ebook	10–11	3734	\$29.95
Year 6 ebook	11–12	3735	\$29.95

Teach foundations for economics and business

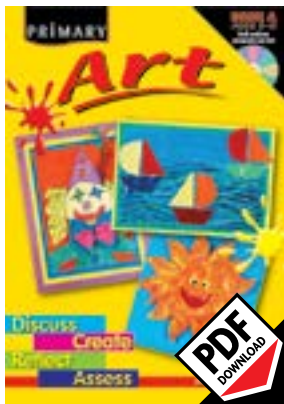

Australian Curriculum Economics and business is a two-book series designed to help teachers introduce foundational concepts of economics and business. The series provides information on making choices on resources, the effects of consumer and financial decisions, and business activities. Each activity has HASS links to further the skills and knowledge of students.

Features

- There are three sections per book relating to the inquiry questions. These sections look at a wide range of economics-based content, including resources, decision-making and implications of activity.
- Each book has an economics and business term glossary, designed for each year to incorporate relevant content in the easiest manner for learning.

Primary art

Inspire the artist in every student!

- » Seven-book series
- » Suitable for Foundation to Year 6
- » Linked to the Australian Curriculum

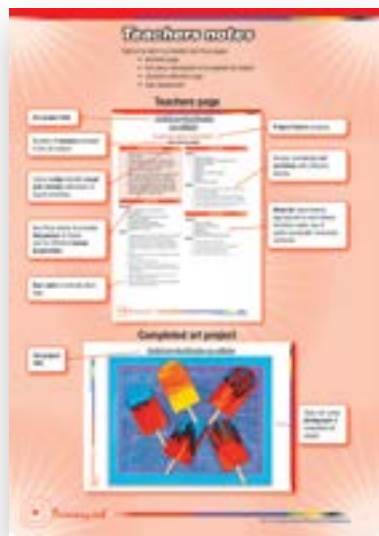

Primary art is an essential companion for any arts classroom. Use the spectacular colours, mesmerising mosaics and thought-provoking questions to inspire the artist in your students. Keep them engaged with this must-have teacher resource.

Features

- Each book has 30 compelling, multi-skilled activities, ranging from ‘quick and easy’ to ‘more sophisticated.’
- Comprehensive teacher notes and lesson plans provide ideas to facilitate engaging class discussions.
- You can encourage artistic progress through student self-evaluation sheets and task assessments.

This three-book series is packed full of activities to inspire students to communicate through visual arts.

Features

- Extensive teacher notes provide stimulus for each lesson, as well as background resources.
- Students' artistic development is aided through variations, reflective questions and extension activities.
- The activities cover three areas including drawing, painting and printmaking, with readily available resources.

Early childhood art

	AGES	CODE	PRICE
Painting and printmaking	3–7	6593	\$44.95
Collage and construction	3–7	6594	\$44.95

Inspiration for early art students

These two books provide inspiring, effective art projects for early childhood.

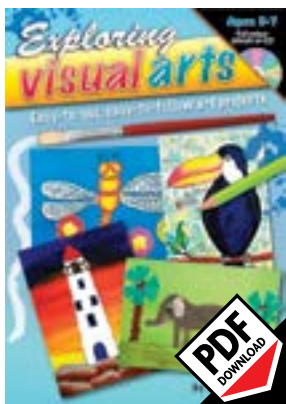

Features

- Both books have an easy-to-use layout and comprehensive teacher information.
- Children can self-assess with reflective and evaluative questions.
- The series has fun and colourful painting, printmaking, collage and construction activities.

Exploring visual arts

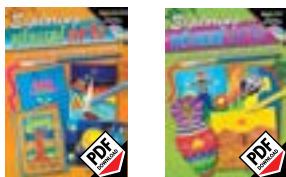

THE ARTS

Easy-to-use, easy-to-follow art projects

- » Three-book series
- » Suitable for Foundation to Year 6
- » Classroom-tested art projects

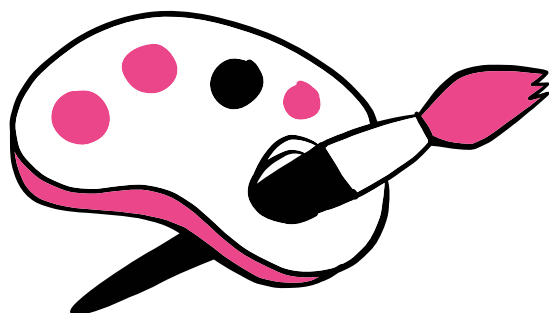

Exploring visual arts is a series of full-colour books, designed to provide teachers with a range of art lessons. The activities provide skills, techniques and ideas to satisfy curriculum requirements through classroom-tested art projects based on different topics suited to each age level.

Features

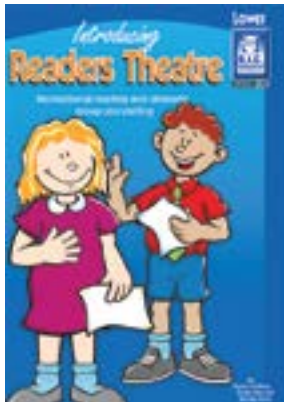

- Extra teacher resources are provided, such as sample art assessments, templates and student self-assessment sheets.
- Easy-to-follow instructions are supported by colour photos of each completed project in the book and on a CD.
- Each engaging activity ties into the four strands of Visual arts in the Australian Curriculum.

Higher-order thinking skills

For a free sample, go to:
ricpublications.com.au/hotssample/

Give your students the critical-thinking skills they need to succeed

- » Six-book series
- » Suitable for Years 1 to 6
- » Easy to use and integrate into your existing program

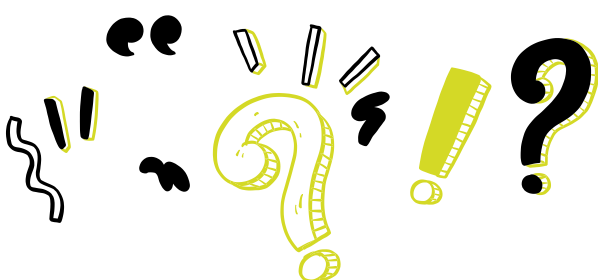

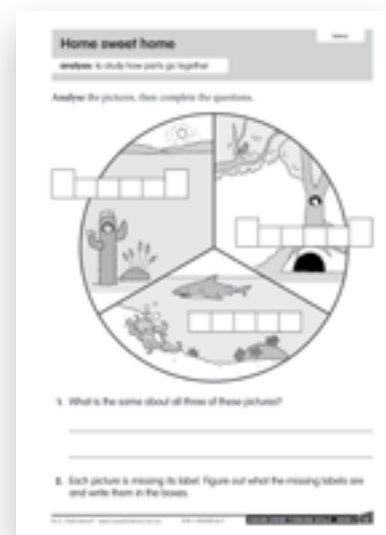

In the fast-paced and ever-changing world we live in, never has there been a more important time to develop critical thinking skills—but how do you fit this into an already-packed schedule?

Higher-order thinking skills is the answer! Through a range of engaging and challenging activities designed to test and strengthen problem-solving skills, this series helps students make deeper connections by integrating their learning across key curriculum areas.

Features

- Each book has engaging logic puzzles, brainteasers and more, to build and grow students' problem-solving skills.
- *Higher-order thinking skills* has a range of individual activities, each focusing on a behavioural verb such as *analyse*, *predict* or *design*, while integrating into different curriculum areas.
- The themes are applicable across all subject areas and in everyday life.

ricpublications.com.au/learning-at-home-workbook-sample/

Make learning from home easy, fun and productive

- » Six-book series
- » Suitable for Years 1 to 6
- » Provide consistent practice across key learning areas

Designed to be easily accessible and great to use both from home or in the classroom, these workbooks will help your child revise essential schoolwork and reinforce taught concepts. Great for independent learning, your child will be presented with English, mathematics and science activities that are curriculum aligned, ensuring consistent practice across key learning areas. Each workbook contains enough work to cover a minimum of four weeks, with a subject area allocated for each week.

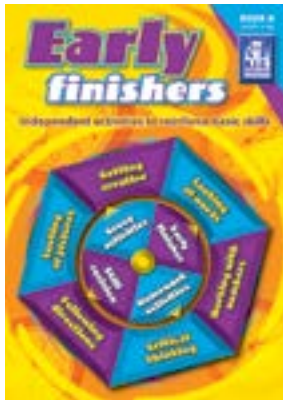

Features

- Each workbook goes through all key English areas—reading comprehension, grammar, writing and editing—to ensure that your child doesn't experience any gaps in learning.
- The mathematics section provides consistent practice that will reinforce and consolidate your child's current mathematical knowledge.
- Different areas of the science curriculum have been selected, with some simple experiments included.

Sample pages from Workbook 3

Early finishers

Independent activities to reinforce basic skills

Early finishers is a series of teacher resource books containing a range of high-interest, creative and challenging activities to satisfy the demands of the early finisher. All activities relate to the primary school curriculum in English, mathematics and art, and can be completed independently.

Features

- This series provides a variety of reproducible, ready-to-use puzzles and brainteasers to motivate students, keeping them actively and constructively engaged as they practise a range of skills.
- Each book engages students with activities that focus on looking at words, working with numbers, critical thinking, following directions, looking at pictures and being creative.
- *Early finishers* is easy to use and flexible, and is great for individual, paired or small-group work. The activities are designed to encourage students to work independently.
