Robotic pets

Robotic pets: my opinion

- Robotic pets, like cats and dogs, are now available. But
- think they should be banned. If a robotic pet <u>is</u> bought for a **young** child, it could **teach** him or her that pets can be

for a young child, it could teach nim or ner that pers can be ignored or mistreated whenever the child's mood changes. What would happen if one day the child receives a real pet? He or she may treat it the same way.

Some robotic pets are used in nursing homes for *elderly* people who are unable to care for a real pet. I understand that this may give them some *comfort*, <u>but a robotic</u> <u>pet can't give you love like a real animal can. I think nursing homes should have</u> *volunteers* who regularly <u>bring</u> in real pets for a few hours at a time *instead*.

The only *positive* thing about robotic pets is that it might save some animals from being treated *cruelly* by their owners. But the cost of robotic pets is still too high for most people's *budgets*.

When the star's light passes *through* these layers of air, the light is bent or 'refracted' *differently* by each layer. Eyewitness account

I was standing calmly at the traffic lights at St Lucy's Square when I heard the sound of running footsteps a few metres behind me. I turned to see a young man viciously snatch an elderly woman's handbag from under her arm. Then he pushed her over and kept running. I raced over to the woman, who was struggling to her feet. As there was no-one else in sight, I yelled out for help and was relieved to see a police officer round the corner. We carefully helped the woman into a nearby shop *where* the owner kindly gave her a glass of water. She recovered guickly and helped me to give a description of the man who had robbed her.
